Hi Gary,

I know we will need to provide a complete list of waste on-site and corresponding waste characterization. We've started a TCEQ webpage where we can upload all applicable documents so that the PRPs may access them. We're aiming to have all the information uploaded on the website by October 20th or sooner so everyone has time to look over the documents before the meeting. Would you feel comfortable presenting at the meeting to provide an overview of EPA's removal action and tentative schedule?

Thanks,

Audrey Smith

Subject: EPA OSC Site

Please review the epaosc.net site "site information" and let me know which documents we should show the PRPs. I think the Action Memo, Pictures, and Sample Results.

Thanks

Gary Moore
